- SKIN TIGHTENING, LIFTING

EPILATION DEVICE

MULTIPLE EPIL PORTABLE LIGHT

Code 6914

MULTIPLE EPIL PORTABLE LIGHT IS A HAIR REMOVAL DEVICE THAT COMBINES 2 EPILATION SYSTEMS: MULTIPLE EPIL "ON THE MOVE" TECHNOLOGY AND STANDARD IPL TECHNOLOGY.

What is MULTIPLE EPIL?

A method of epilation that combines technology for fast hair removal with intense pulsed light which ensures painless treatments.

- > "On the move" technology
- > Less energy with more effective results
- > Reliable and efficient for all skin types
- > Painless treatment
- > More pleasant treatment due to higher frequency
- > Super power 2000W

PRINCIPLE OF TREATMENT

"On the move" technology represents a breakthrough in terms of client comfort, speed, procedure and constant clinical results. Why? It allows a gradual rise in temperature to the required temperature of therapy, without the risk of injury and with much less pain.

MULTIPLE EPIL PORTABLE LIGHT is unique because its painless process works on the go, with the innovative Multiple Epil technology, a "wiping" technique that eliminates the problem of missed or skipped areas on the skin. Complete coverage means smooth legs, arms, back and face for all clients, without pain.

USE

- > HAIR REMOVAL
- > SKIN REJUVENATION
- > PIGMENTATION REMOVAL
- > ACNE REMOVAL
- > SKIN TIGHTENING AND LIFTING

FUNCTIONS

MULTIPLE EPIL PORTABLE LIGHT system has 4 main functions:

- > It allows the operator to choose the best parameters for his client
- > It controls the work process of the system and prevents difficulties
- > It controls the energy within the system
- > It chooses the scope of treatment

SCREEN DISPLAY

ADVANTAGES

ADVANTAGES OF INTENSIVE PULSATING LIGHT:

- > With Intense pulsating light, due to the wide range of wavelength spectrum, it is possible to adapt the wavelength to the skin color, color and thickness of the client's hair
- > Replaceable filters from 420 to 1200 nm
- > Painless and comfortable method

ADVANTAGES OF TECHNOLOGY ON THE MOVE:

- > Epilation of large areas in a short time
- > Hair heating temperature lower than 42C
- > Wavelength range 690-1200nm
- > It uses lower energy with a higher pulse release frequency

ADDITIONAL EQUIPMENT

Code 3382

Code 309

Code 3341

Technical characteristics

Wavelength	640-950 nm
Counter on handle	Yes
Spot size	8*40 mm ² , 15*50 mm ²
Energy	1~36 J/cm ² , 1~50 J/cm ²
Timer	1-60 s
Pulse frequency	1-10 Hz
Pulse	One
Pulse on	2-20 ms
Display	8,4" color touch screen
Power	2000 W
Voltage	220-230 V AC, 50/60 Hz
Number of handles	1 (one IPL handle or one Multiple Epil handle)
Cooling System	Air + water circulation
Dimensions (LxWxH)	740 x 610 x 630 mm
Weight	50 kg
